# TRICONE BIT

5-1/2" dia.

6-1/2" dia

7" dia

+ more

## TCI BIT

The TCI tricone bit is designed for medium to medium-hard rock formations (10,000 - 28,000 psi) such as shale, limestone, granite, etc.

Multiple diameters 5-1/2" to 10-5/8"

## MILLTOOTH BIT

The Milltooth variation of the Radius 'Focus' Tricone is designed for soft rock formation less than 10,000 psi such as sand, clay stone, and soft shale.

Multiple diameters 5-14" to 6-3/4"

## OUR SUPPLIER PARTNERS:

# PDC BIT

## PDC BIT

Polycrystalline Diamond Compact (PDC) bits are forged to get through solid consolidated grounds, such as hard clay, sandstone, soft sands. With no moving parts, this bit has a long lifespan. This bit drills fast and has a high penetration rate, shearing the rock rather than grinding/crushing.

We sell American-made PDC bits, built with American steel to ensure our customers make a quality investment. Manufactured with horizontal use in mind, balanced machining, elongated flutes, side gauge protection where it matters and cutter placement to accelerate drilling solids.

## PDC Reamer

We also offer PDC reamers in variable sizes from 6" to 30". The taper centralises the reamer in the pilot hole ensuring asymmetrical cuts. The spirals reduce chatter and torque fluctuation.

# ROCK BIT

## RADIUS ROCK BIT

Our most versatile tool delivers greater steering and control in soft conditions while letting you navigate loose rock and solid rock conditions too. Combined with Radius' patented Hot Shot pull-back adapter, it's one of the most popular bits on the market today.

## COBBLE BIT

Made to move rock, this design is field-proven to cut and steer through loose rock, rubble and cobble.

Carbide buttons, hardfacing, with the patented hot-shot adapter, the cobble bit continues to deliver!

## SINGLE-ROLLER CONE

Carbide-covered steering plate and additional carbide on the face, the single-roller cone piece delivers optimal steering and grinding capabilities for your loose rock jobs!

# ABOUT US

**JB Trenchless is your one-stop-shop for all your HDD tooling and equipment needs.**

**With over 30 years of experience, our team has the knowledge to meet all our customer's unique needs. We leverage our expertise to solve any HDD problem.**

**Our commitment to customer satisfaction has earned us a loyal following. We help you get the job done.**

**JB Trenchless is more than a provider of all things HDD, we are your partner in drilling.**

**Visit our website to learn more about what we offer!**

**Contact us today to let us know how we can help with your drilling project!**
